

Kalmar Training Academy Courses

Enhancing your team's skills

Kalmar Training Academy offers four different training courses that can enhance your teams' driving skills, safety, and technical expertise.

These courses can be held at your site for your convenience with our experienced trainers, or there are a few modules that are available on-line. We would recommend face to face training as we have found it is more effective and generally achieves better results.

The four training courses that you have to choose from are:

- Eco Driver
- Eco Reachstacker Operator
- Safety Expert
- Driver Training.

Customer feedback - Kenya.

"The Kalmar Eco Driving Training was very impactful for our team. It opened our eyes to more efficient driving techniques, helping us reduce fuel consumption while improving safety and equipment handling. The practical sessions were easy to follow, and our operators now feel more confident in applying what they learned. We have already noticed improvements in fuel efficiency and smoother operations. This training is a real value-add for our business."

Kalmar Training Academy Courses are for:

Equipment Operators, Maintenance Technicians, and Terminal Managers who work with Kalmar's port, terminal, logistics and heavy material handling equipment. The training is for professionals who want to gain & enhance their skills in operating machinery safely and efficiently, improve maintenance and repair capabilities, and optimise overall operational performance through effective equipment management and new technology integration. It's for those aiming to increase productivity, reduce downtime, and ensure compliance with the highest industry safety standards.

Our trainers:

Jason Gilbert: Global Technical Trainer, Shrewsbury, UK

Renold Tarkenter: Global Technical Trainer, Shrewsbury, UK

Conny Eliasson: Global Technical Trainer, Ljungby, Sweden

Jim Keeffe: Global Technical Trainer, Ottawa, USA

Rufino Borrero: Global Technical Trainer, Ottawa, USA

Andreas Schmunk: Global Technical Trainer, Hamburg, Germany

Duration of courses: Reserve 1-3 days for training, depending on group size and scope to be covered.

Location of course: On-site.

Eco Reachstacker Operator

Knowing how to operate your Eco Reachstacker effectively as possible will help significantly reduce your fuel consumption and emissions, as they are different to driving a regular diesel powered reachstacker. In this course your driver's will learn:

1. What makes an Eco Reachstacker different
2. About the new functions that are unique to this machine
3. Driving and lifting techniques that should be used to reduce tyre wear and fuel consumption
4. How to perform a daily inspection
5. How to operate their machine as safely as possible
6. How to get the most out of their display data.

Number:
Max 10 participants

Duration:
2 days

Prerequisites:
None required

Location:
On site,

They will also gain a greater understanding of specific maintenance requirements and how to get the most out of their Eco Reachstacker.

Eco Driver

In this course your operators will learn more about the impact that carbon emissions are having on our environment and how to adapt their day-to-day routine and driving style to help reduce fuel consumption and thereby emissions.

Key to the success of this course is showing your driver's how to:

1. Perform daily inspections to help keep your equipment running optimally
2. Driving and lifting techniques that can help reduce tyre wear and fuel consumption
3. How to operate their machine as safely as possible
4. Get the most out of their display data.

They will also gain a greater understanding of how emissions are produced, how they can be monitored and what else they can do to mitigate them.

Number:
Max 10 participants

Duration:
2 days

Prerequisites:
None required

Location:
On site,

Driver Training

Having skilled and qualified drivers is key to making your operations as safe and efficient as possible. This course offers a mix of e-learning combined with hands on training. This course will:

1. Give your drivers the chance to learn how to operate forklifts, reachstackers, terminal tractors or empty container handlers
2. Teach them how to operate their equipment safely and eco-efficiently
3. Safety options available in their machines
4. How to perform daily inspections.

This course will also cover the importance of reducing stress in the workplace, workspace and emergency planning, plus the importance of safety rules that should apply to all employees.

* Swedish Drive Licence can also be provided upon request.

Number:
Max 10 participants

Duration:
2 days

Prerequisites:
None required

Location:
On site,

Safety Expert

Keeping your people safe is out top priority which is why this course is focused on operating your equipment as safely as possible and helping to enhance your teams' safety skills. This course focuses on:

1. How important safety rules and emergency plans are
2. How you can make the area you operate in safer
3. Correct safety clothes
4. Safety options available in their machines
5. How to operate their machine as safely as possible.

This course will also cover the importance of first aid training, reducing stress in the workplace, safety briefings for visitors and the importance of safety rules that should apply to all employees.

Number:
Max 10 participants

Duration:
2 days

Prerequisites:
None required

Location:
On site,
